

Clean Energy Schools Symposium

WASHINGTON, DC | MARCH 26-28, 2023

Generation180 is hosting the inaugural Clean Energy Schools Symposium in Washington, DC to bring together its nationwide [School Leadership in Clean Energy \(SLICE\) Network](#) and to elevate the role of the education sector as a force towards building a clean energy future.

During the Symposium, invited K-12 school leaders will be empowered and equipped to further advance clean energy adoption in their schools and communities. The Symposium will feature the nation's most innovative case studies and deliver best practices, strategies, and resources from experts on building energy and clean transportation. The event will facilitate the exchange of knowledge and experience amongst K-12 school leaders in a variety of roles across the country.

Who was selected to attend?

Generation180 has invited a select cohort of K-12 school leaders who were selected to join based on their success in advancing clean energy in their schools/district. With generous support from event sponsor FedEx, Generation180 is offering a scholarship to network members that covers the cost of event registration, transportation, lodging and meals during the Symposium.

Why should you attend?

- **Support for reaching new goals:** The Symposium is designed to help attendees be equipped to continue to advance clean energy adoption in their schools/district. Topics will include funding opportunities and resources, how to institutionalize clean energy in districts, solar + battery, education applications, leadership and team building, and more. Education sessions will be facilitated in a variety of formats that support learning and exploration of new ideas and methods for achieving clean energy goals.
- **Peer-to-peer learning and networking:** The Symposium is bringing together a knowledgeable network of K-12 leaders with experience in clean energy. There will be dedicated time for peer exchange to discuss project ideas, explore solutions to challenges, and share best practices. Attendees will gain new insights and perspectives by engaging

with school leaders across the country in a variety of roles, including school board, superintendents, facilities and operations, transportation, sustainability, and more.

- **Clean energy leadership and expertise:** The Symposium is providing a forum for attendees to expand their network outside of the education sector and deepen their knowledge in clean energy and sustainability. Attendees will have the opportunity to connect with respected leaders and experts from different sectors and apply what they learned to their work in education.

What can you expect to learn or gain by attending?

- New federal funding opportunities and financing mechanisms
- Insights for building internal and external support for advancing clean energy
- Inspiration from innovative school clean energy projects
- Support and planning time for advancing new clean energy goals
- Insights and lessons-learned from peer school leaders
- Lessons from early adopters of battery storage and electric school buses
- Connection to a nationwide network of education leaders in a variety of roles
- Deeper knowledge of a range of cutting-edge clean energy technologies
